OBJECTIVE

Motivated CSE undergraduate at IET Bareilly (CGPA: 7.93) with strong foundations in Data Structures, Algorithms, and full-stack web development. Experienced in building and deploying MERN stack applications, with hands-on open-source contribution experience. Seeking a software engineering internship to deliver impactful solutions in a collaborative, fast-paced environment.

EDUCATION

Bachelor of Technology in CSE, Institute of Engineering and Technology (MJPRU), Bareilly 2023 – 2027
CGPA: 7.93

Intermediate (Class XII), Gola Public Inter College, Gola 2022 – 2023
Percentage: 85.2%

SKILLS

Programming Languages	Java, C++, Python, JavaScript, TypeScript, R
Web Technologies	HTML, CSS, Tailwind, React.js, Node.js, Express.js, REST API, JWT
Database	MongoDB, MySQL
Computer Science	Data Structures and Algorithms, OOPs, DBMS, Software Engineering, CN, OS
DevOps & Tools	Git, GitHub, Docker, CI/CD, GitHub Actions, VS Code, Postman, Vercel, Render

EXPERIENCE

Open Source Contributor June 2026 – Present
OpenScienceLabs

Contributing to the OpenScienceLabs MkDocs-based website, resolving reviewer-raised issues including portable date formatting, thumbnail rendering fixes, search popover alignment, and navbar overflow bugs. Worked with Docker and CI pipelines to validate and test changes across environments.

PROJECTS

Interview Preparation App (Full Stack) [\[GitHub\]](#) [\[Live\]](#)
Developed a full-stack interview preparation platform with AI-powered question generation, session tracking, and user authentication. Set up a CI/CD pipeline using GitHub Actions for automated build and deployment, and deployed the application on Vercel and Render for scalability and accessibility.
Tech Stack: React, Node.js, Express, MongoDB, GitHub Actions, Vercel, Render

Bloom (React + Tailwind) [\[GitHub\]](#) [\[Live\]](#)
Developed a modern, responsive web application using React.js and Tailwind CSS with dynamic routing, state management, and interactive UI components. Deployed on Vercel.
Tech Stack: React.js, Tailwind CSS, Vercel

Disease Detection App (Machine Learning) [\[GitHub\]](#)
Developed a machine learning-based disease prediction system using multiple ML algorithms for classification, with data preprocessing and feature selection to improve prediction accuracy.
Tech Stack: Python, Scikit-learn, Pandas, NumPy

ACHIEVEMENTS

- Proficient in DSA: solved 290+ problems on LeetCode
- Ranked among the top 50 students in the district in Class X board examinations

CERTIFICATIONS

- [Certificate of Excellence in DSA MasterMind – MCQ Elimination Round \(CodeClash: The Battle of Logic\)](#) — Unstop, June 2025.
